

May 27th, 2014, Became a lucky day for ten people in Poland.

The International cargo service delivered the nominated recipients their free of charge, fitted by size wheelchairs. Some of them could hardly believe in the miracle to be again out of bed, to stay with their family, enjoying meals together, visiting relatives next door or across the street, attending high schools and friends' gatherings.

New and more fulfilling life was delivered with their mobility.

We express our deep appreciation to all the supporters of Wheels of Life Project!

We look forward to working together for betterment of life of neglected handicapped people!
